

# **AUTOMATIC ROTATING PLANT**

## CAROUSEL FOR AUTOMATIC MOVING OF BOWL-CARRYING

### **FULL MIXING PHASE INTEGRATED SOLUTION**

A carousel for automatic moving of bowl-carrying that serves the Working stations. Higher productivity and qualitative homogeneous products due to the automatic control of the mixers, the movement of the trolleys, dumpers and portioning hoppers.

## HIGH PRODUCTIVE POTENTIALS - FLEXIBILITY - MODULARITY

For some productions, the quantity of dough that a compartment can handle can be as much as  $2500\text{-}3000\ kg/h$  and beyond.

MIXER designers in collaboration with the customer's technicians can customise the necessary plant for all mixing needs:

BY DEFINING the number and the type of Working stations (dough mixing, rest, lifting); BY CALIBRATING the features and functions of the mixers, lifters and the portioning hoppers.

#### **CLEANING AND MAINTENANCE EASE**

Particular care is taken in the design to make the cleaning and maintenance of all the components of the plant simple.

#### **FULL SOLUTIONS**

The system can be made chosing machines from MIXER industrial range: **PRO E** and **AVANT FORCE** with single or double SPIRAL

IBT E with BEATER ARMS

FOR E with FORK

MR double tool bridge shaped industrial planetary mixer
